

**CHICAGO CAREER TECH**

Growing Chicago's Technology Workforce

# HIRING?

**We can help you!**

Chicago Career Tech is a leading resource for businesses providing access to a variety of recruiting resources and a pool of talented, recently retrained Chicagoans. We offer immediate access to experienced (ages 25-69), educated (50% Bachelor's degree or higher), and industry certified professionals you need to fill current and future job openings.

## 1. Receive Direct Exposure to Prospective Hires Training in High-Growth Industries

Chicago Career Tech trains unemployed Chicagoans to acquire new skills in high-demand, high-growth industries that businesses need now. We work directly with Chicago companies to learn the capabilities that you are looking for in your employees and create training programs tailored to your needs. Upon successful completion of the program, our graduates – half with a bachelors degree or higher – are armed with industry-recognized certifications, fresh on-the-job experience and are prepared to secure currently available job opportunities. The hands-on learning component provides you the opportunity to preview prospective hires for up to six months to determine how they might fit permanently within your organization.

## 2. Access Prescreened Candidates for Hire

Browse our proprietary database of over 700 and growing diverse, educated and seasoned professionals representative of demographics within the City of Chicago. With an age range of 25-69 and years of professional experience, all participants participate in a "in-person" screening and testing process with PeopleScout and TalentWise prior to placement in the program. This ultra-competitive process helps us select the top candidates from a pool of thousands. By providing us with your position needs, we can provide you a customized source of appropriate, ready-to-hire graduates to meet.

## 3. Customize a No-Cost Pathway to Employment for Your Organization

Create a custom training program to prepare participants for employment within your organization. Participants will receive classroom training – conducted by an in-house team or through a sub-contracted public training institution – that aligns with your needs and results in industry-recognized certification. Deploy participants within your organization for hands-on learning and application of classroom instruction. Upon completion of training, you may interview and consider participants for employment.

# JOIN THE 100+ COMPANIES THAT HAVE HIRED CHICAGO CAREER TECH GRADUATES!

## 4. Offset Training Costs to Fill Skilled Positions

Hands-on learning partners that hire a participant from the program can be reimbursed for a portion of the wages of the On-the-Job Trainee, while an employee goes through training. This allows business partners the opportunity to reduce the financial burden associated with integrating a new employee into their company.

## 5. Utilize High-Traffic Recruiting & Hiring Resources

Take advantage of our job posting board to target a pool of skilled professionals at no cost. Receive invitations to participate in free job fairs to meet and screen freshly credentialed, experienced candidates, providing a customizable hiring focus.
